

selfdrivenOS Tokens as Assets within a learning community

Facilitating a community

Accountability
Food
Environment
Reflection
Growth Recognition

Tokens
Auto-Staked
into learning
community

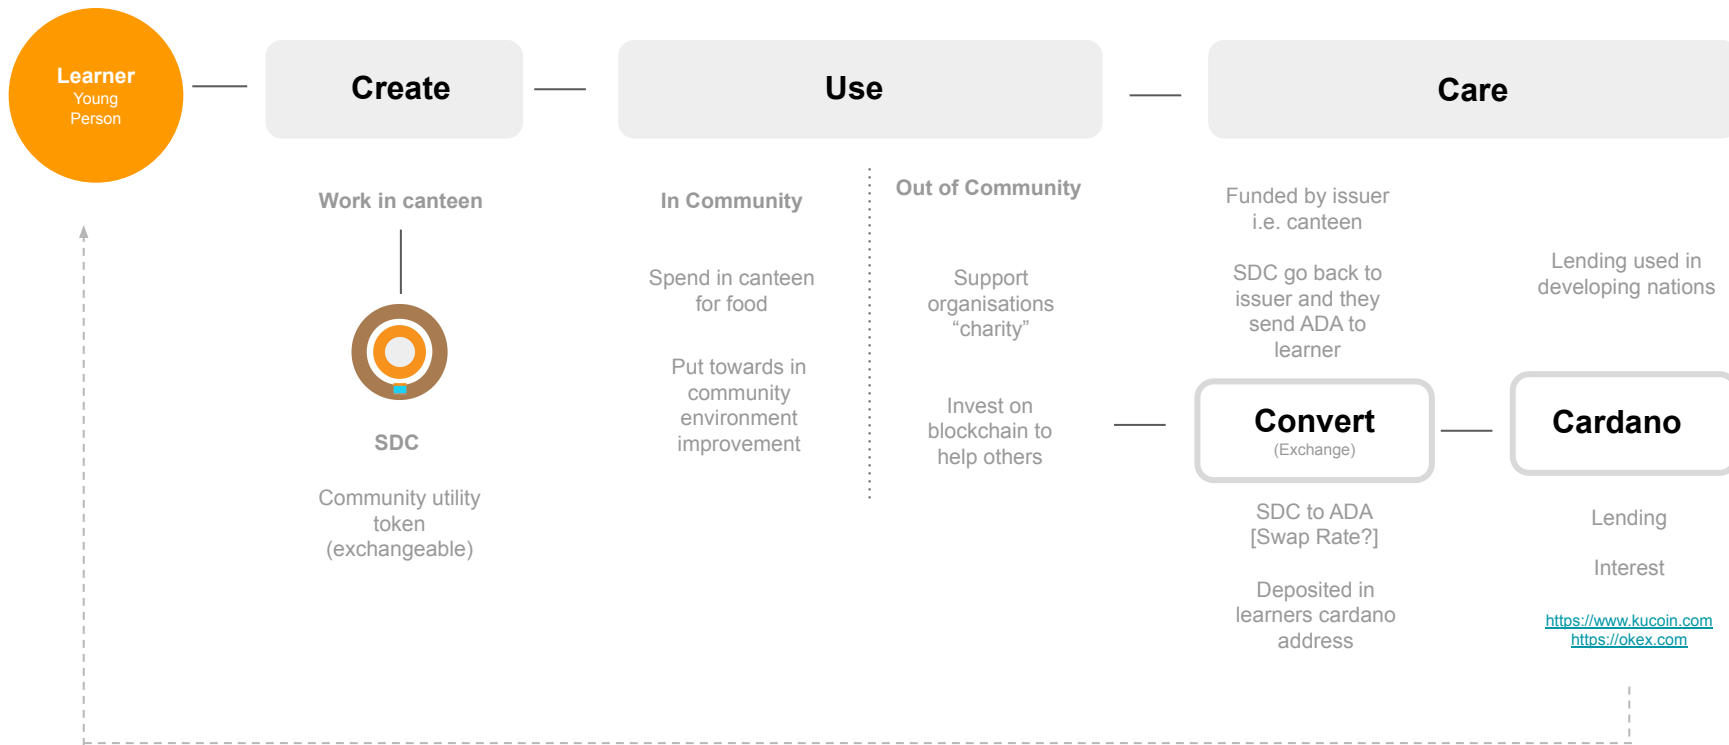

Tokens can only
be traded as
outer value.

FT; Fungible
Token

NFT; Non-Fungible
Token (Unique to
Learner)

SDC Community / Caring Token (Utility)

e.g. Work in canteen = caring for self, caring for others

	Token Name	Use Case	Policy
Foundation	SDF 	For the SSDLF Foundation , governance, utility to power development and platform. [On chain interactions / fees / rewards*]	Fungible Token (FT)
Community	SDI 	Community identity (member, community, skill) token for SDE, SDR & SDA.	Non-Fungible Token (NFT*)
	SDC 	Community utility token for governance, reward for effort, caring for self/others.	Fungible Token (FT)
	SDE 	For Endorsements , for positive behaviour, use as utility for services, stake for governance.	Non-Fungible Token (NFT*)
	SDR 	For Reflections , Learning reflections in the form of public endorsements etc.	Non-Fungible Token (NFT*)
	SDA 	For Achievements , skills, course completions / credentials etc.	Non-Fungible Token (NFT*)

* Non-fungible as the token transaction ("asset") is linked a person (learner) - so unique.

Cardano Blockchain, using multi-asset functionality for tokens

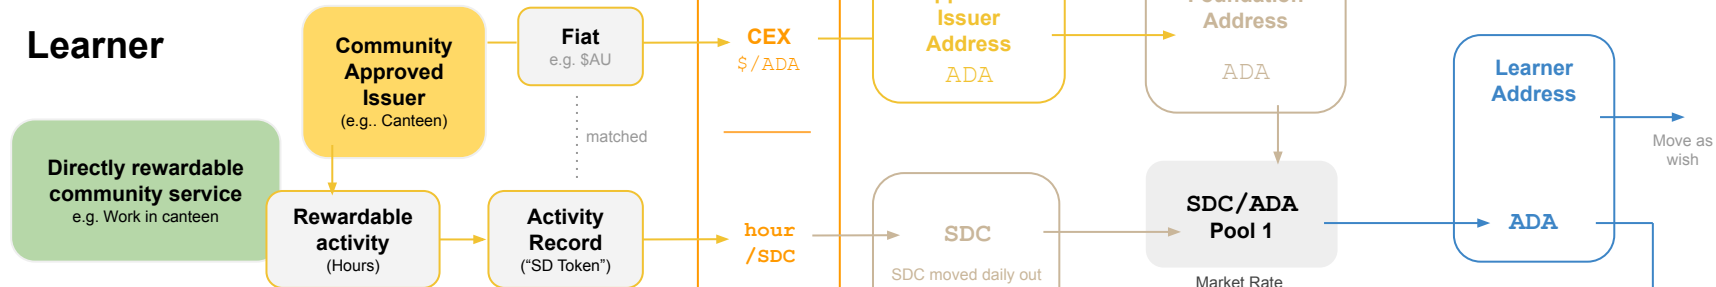

selfdrivenOS Achievements as On-Chain Assets

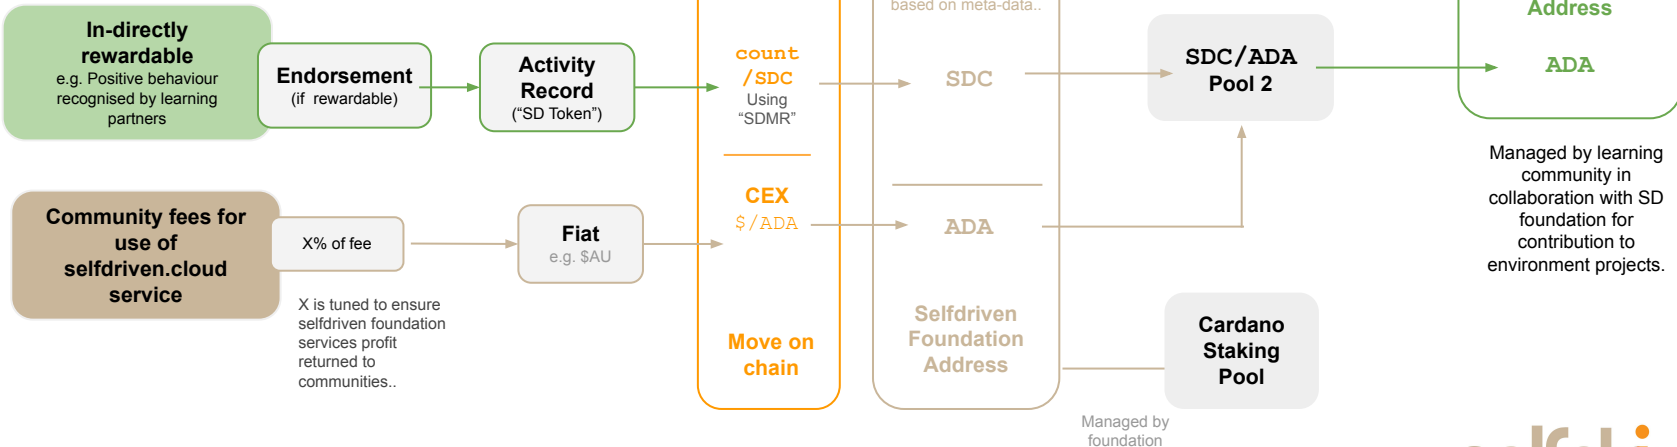

Move to "On-Chain"

Learner

Community

CEX = Central Exchange

Pool 1 = Learner Managed

Pool 2 = SD Foundation

selfdriven

selfdrivenOS On-Chain Policies

Foundation

For minting Foundation Tokens
Once off, 200,000 tokens.

Identity

For minting Identity Non-Fungible-Tokens

Community

For minting Community Fungible-Tokens
For use on-chain for projects and exchanging; Sundae Swap Pool

Recognition

For minting Recognition Non-Fungible-Tokens
I.e. Achievements, Endorsements & Reflections

Metadata

Policies can be used to
mint tokens using the
different metadata IDs -
ie formats.

selfdrivenOS On-Chain Metadata IDs

SDF (sdf)
115100102

SDA (sda)
11510097

SDI (sdi)
115100105

SDR (sdr)
115100114

SDC (sdc)
11510099

SDE (sde)
115100101

```
"type": "community-member",  
"type": "skill"  
"type": "community-organisation"
```

e.g.

Community Member

```
{ "115100105":  
  {  
  
    "type": "community-member",  
    "sdi": "3a22327d-eff6-4875-88ba-bd024709c295",  
    "firstname": "Harry",  
    "lastname": "Jones"  
  }  
}
```

Achievement

```
{ "11510097":  
  {  
  
    "sdi": "3a22327d-eff6-4875-88ba-bd024709c295",  
    "issueddate": "01 JAN 2022",  
    "skills"  
    [  
      {  
        "sdi": "4ba22327d-eff6-4875-88ba-bd024709c295",  
        "notes": "This is an optional note"  
      }  
    ]  
  }  
}
```

selfdrivenOS On-Chain Identity

Metadata Format ID: “115100105” ie like “721”,
SDI as ASCII

Key is the selfdriven “UUID”
i.e.3a22327d-eff6-4875-88ba-bd024709c295

```
{ "115100105":  
  {  
    "sdi": "3a22327d-eff6-4875-88ba-bd024709c295",  
    "firstname": "Harry",  
    "lastname": "Jones"  
  }  
}
```

Minted using the selfdriven Identity Policy ID

selfdrivenOS On-Chain Recognition Metadata

Achievement

Metadata ID: "11510097"

This has been issued by selfdriven Foundation is a combination of the policy ID ie "Recognition Policy" that minted it and the Metadata ID i.e. the format

```
{ "11510097":  
  {  
    "sdi": "3a22327d-eff6-4875-88ba-bd024709c295",  
    "issueddate": "01 JAN 2022",  
    "skills"  
    [  
      {  
        "sdi": "4ba22327d-eff6-4875-88ba-bd024709c295",  
        "notes": "This is an optional note"  
      }  
    ]  
  }  
}
```
